Hong Nhu (Naomi) Lac

Data Scientist | Data Analyst | Business Intelligence | Predictive Analytics

Address: Ballajura, WA 6066

Mobile: 0476 979 038

Email: lachongnhu@gmail.com

LinkedIn: https://www.linkedin.com/in/hong-nhu-lac-9374b8206/

Career Objective

Master of Predictive Analytics graduate with a bachelor's degree in Banking and Finance, combining strong analytical skills with business understanding. Experienced in data analysis, predictive modelling, machine learning, and data visualisation using Python, SQL, Power BI, and Tableau. Seeking a Data Analyst or Business Analyst role to apply data-driven insights to support business decision-making and process improvement.

Education

Master of Predictive Analytics **Feb 2023 – Jan 2025**

Curtin University, Perth, Australia

Merit Scholarship

Course Weighted Average: 86.13/100

Bachelor of Banking and Finance **Sep 2017 - Jun 2022**

Banking University of Ho Chi Minh City, Vietnam

GPA: 8.08/10

Key skill summary

- **Programming & Analysis:** Python (Pandas, NumPy, Matplotlib, Scikit-learn), R (RStudio), Machine Learning, Predictive Modelling, Data Cleaning & Preprocessing, Feature Engineering, Statistical Analysis, Data Mining & Analysis.
- **Data Visualisation & Reporting:** Power BI, Tableau, Excel, Data Reporting & Visualisation.
- **Machine Learning Techniques:** Regression, Classification, Clustering, Random Forest, XGBoost, SHAP Analysis, Time Series Analysis.
- **Databases & Data Management:** SQL (MySQL, PostgreSQL)
- **Cloud & Technical Tools:** Cloud Computing (AWS), Jupyter Notebook, Google Colab, VS Code.

Projects

Airbnb Market Analysis & Price Prediction Project

Tools: Python, Power BI, Machine Learning

Link: https://github.com/lachongnhu-create/airbnb-market-analysis

- Analysed 250K+ Airbnb listings and 5M+ reviews to identify pricing trends, demand patterns, and investment opportunities.
- Performed data cleaning, feature engineering, and exploratory analysis using Python (Pandas, NumPy).
- Developed and compared machine learning models including Random Forest, XGBoost, Gradient

Boosting, and Extra Trees for price prediction.

- Applied SHAP analysis to identify key factors influencing Airbnb pricing decisions.
- Built interactive Power BI dashboards presenting market insights, price drivers, demand trends, and investment recommendations.
- Delivered actionable insights by identifying premium markets, affordable growth opportunities, and neighbourhood-level investment opportunities.

Research Project: Exploring the Influence of Maths Background on Student Success in STEM Disciplines, Curtin University

Tools: Python, MySQL, Tableau, Microsoft Excel, Jupyter Notebook, VS Code

- Cleaned and analysed academic datasets containing student demographic and performance information, mathematics background, and university performance data by using Python and MySQL.
- Performed data preprocessing, validation, and exploratory data analysis (EDA) using Python and SQL to identify trends and relationships.
- Applied statistical analysis and predictive modelling techniques to examine the relationship between mathematics preparation and STEM academic outcomes.
- Developed Tableau dashboards and analytical reports to communicate insights effectively to technical and non-technical audiences.
- Identified key factors influencing student success and provided evidence-based recommendations for academic planning.
- Achieved 91/100 for the project.

Thesis: Factors Affecting Customer Satisfaction in Digital Banking, Banking University of Ho Chi Minh City

Tools: Microsoft Excel, SPSS, Google Forms

- Analysed survey data from 300+ digital banking users using quantitative research methods.
- Applied Multiple Linear Regression and Exploratory Factor Analysis (EFA) to identify key drivers of customer satisfaction.
- Built statistical models evaluating the impact of trust, service quality, convenience, and customer experience.
- Developed recommendations to improve digital banking services.
- Achieved full marks for the thesis.

Employment History

Shift Manager **Jan 2023 – Present**

Sincro Holdings Pty Ltd (McDonald's Ascot Waters), Perth, Australia

- Analysed customer demand patterns and operational workload to optimise staff allocation during peak periods.
- Monitored daily sales, cash reconciliation, and transaction records to maintain financial accuracy.
- Tracked service performance indicators and workflow efficiency to support operational improvements.
- Used problem-solving and decision-making skills to resolve operational issues in a fast-paced environment.

- Trained team members and supported process improvement through effective communication.

Intern – Corporate Customer / Credit Department **Jan 2021 – Jun 2022**

Military Commercial Joint Stock Bank (MB Bank), Ho Chi Minh City, Vietnam

- Reviewed and processed financial documents including loan applications, guarantees, and letters of credit.
- Maintained accurate customer records and financial information within banking systems.
- Analysed financial documentation and supporting information to assist credit assessment processes.
- Performed data verification and quality checks to ensure completeness and compliance.
- Supported preparation of reports, documentation, and operational analysis for corporate banking activities.

Personal Attributes

- Strong **analytical thinking and problem-solving** ability
- Excellent **attention to detail** and data accuracy
- Effective **time management and organisational** skills
- **Adaptable** and quick to learn new technologies and processes
- Able to **work independently and collaboratively** in team environments
- **Calm and focused under pressure** in fast-paced settings
- Strong **communication** and stakeholder support skills.
